

mercury::PortHandler

```
classDiagram
    class mercury_PortHandlerWindows["mercury::PortHandlerWindows"]
    class mercury_PortHandler["mercury::PortHandler"]
    mercury_PortHandlerWindows --|> mercury_PortHandler
```

The diagram illustrates a class hierarchy. At the bottom is a gray-shaded box labeled 'mercury::PortHandlerWindows'. A blue arrow points vertically upwards from this box to a white box labeled 'mercury::PortHandler' at the top. This indicates that 'mercury::PortHandlerWindows' inherits from 'mercury::PortHandler'.
